1. Inclusion of Research Ethics in the Research Methodology course work

THEORY OF HISTORY AND METHODS OF RESEARCH

Programme : M.Phil.,
Semester : I
Course Code : 20MHIC11

Part : Core - I
Hours : 6
Credits : 4

Course Outcomes:

- CO1: Trace the definitions and theories in historical studies.
- CO2: Ability to learn the scientific research methodology in history.
- CO3: Discuss thesis and dissertation writing practice for the research scholars.

UNIT I

Meaning and Nature of History – Definition - Art or Science - Lessons of History - Causation and Change - Role of Ideas - Role of Individuals - Theory of Repetition - Concept of Progress - Recent Trends - Post-Modernism - Annals School - Subaltern Studies.

UNIT II

Philosophy of History - Theological Interpretation - St. Augustine - Historical Determinism - Romantic Idealism - Immanuel Kant and Hegel: Great man theory - Thomas Carlyle; Dialectical Materialism - Karl Marx - A.J. Toynbee - Theory of Challenge and Response.

UNIT III

Development of Historical Method - Aims, Objectives and Kinds of Research – Sources - Primary and Secondary - Sources for History of India - Ancient, Medieval and Modern - Sources for History of Tamil Nadu - Ancient, Medieval and Modern.

UNIT IV

Requisites of a Scholar - Selection of Topic for Research – Collection of Data - Bibliographical Collection - Card file – Analysis - **External and Internal Criticism** - Synthetic Operation - Preparation of outline.

UNIT V

Writing of History - Formulation of Hypothesis – **Objectivity and Subjectivity** - Mechanics of Thesis Writing - Requirements for M.Phil. Dissertation and Ph.D. thesis - Foot Notes – Documentation - Bibliography, Notes and References – Appendix – Preparing a research paper. Research project and thesis – Publication - Proof Reading Techniques - Index, Dell net, Sodhganga etc. - **Ethics in Historical writing – Plagiarism**

Preamble

To provide awareness and skills to distinguish between the theoretical issues of research and practical consideration of research design and also to inculcate the skill of data collection and data analyses and dissemination.

Course Outcomes (CO)

On the successful completion of this course, scholars will be able to

No.	Course Outcomes	Knowledge Level (According to Bloom's Taxonomy)
CO1	Explain the key elements of social research and identification of research problem and research gap	K2, K3 & K4
CO2	Focusing the appropriate research route (methodology, framing and testing of hypothesis)	K2, K3 & K4
CO3	Explain the instruments to be used in planning and analyzing the primary and secondary data to conduct scholarly research project	K2, K3 & K4
CO4	Explore the relevant statistical tools to be applied in supporting the research issues	K2, K3 & K4
CO5	Focusing the exercise involved in the preparation of report writing	K2, K3, K4 & K5

SYLLABUS

UNIT I

Research – Definition – Objectives – Types: Pure, applied – Methods: Case Study, Survey – Research Problem – Definition, essentials, Sources – Research Design – Meaning, steps and significant.

UNIT II

Sampling – Meaning, steps criteria – Methods – Sampling error – Hypothesis – Concepts, steps, sources – Testing of Hypothesis – Chi-square test, 't' test, 'z' test and 'f' test – Limitations.

UNIT III

Data Collection – Primary – Sources techniques – Observation – Interview types, essentials and limitations – Questionnaire & Schedule – Designing – Reliability & Validity – Scaling technique – Pre-testing – Pilot study.

UNIT IV

Data Processing: Meaning, steps – interpretation – Analysis of data – Types of Analysis – Tools of analysis – Correlation-regression, Multivariate analysis.

UNIT V

Report writing – Meaning, target groups – Format – steps in writing – Introduction to Areas of Research. **Ethics in Report writing – Plagiarism – Submission of Report**

RESEARCH METHODOLOGY

Programme : M. PHIL English
Semester : I
Course Code : 20MENC11

Part : Core - I
Hours : 6
Credits : 4

Course Outcomes

- CO1: Identify the research areas and to develop new ideas
CO2: Ability to write and present research thesis/ proposals
CO3: Apply the methods and dimensions of research methodology

UNIT I

A. Research and Writing

1. The Research Paper as a Form of Exploration
2. The Research Paper as a Form of Communication
3. Selecting a Topic
4. Conducting Research
5. Compiling a Working Bibliography
6. Evaluating Sources
7. Taking Notes
8. Outlining
9. Writing Drafts
10. Language and Style

B. Plagiarism

1. Definition of Plagiarism
2. Consequences of Plagiarism
3. Plagiarism Sharing Today
4. Unintentional Plagiarism
5. Forms of Plagiarism
6. When Documentation is Not Needed
7. Other Issues Such as Reusing a Research Paper Collaborative work and Copyright Infringement

UNIT II

The Mechanics of Writing

1. Spelling
2. Punctuation
3. Italics (Underlining)
4. Names of Persons
5. Numbers
6. Titles of the Works in the Research Paper
7. Quotations
8. Capitalization and Personal Names in Languages

UNIT III

The Format of the Research Paper

1. Margins
2. Text Formatting
3. Heading and Title
4. Page Numbers
5. Tables and Illustrations
6. Paper and Printing
7. Correction and Insertions
8. Binding
9. Electronic Submission

UNIT IV

A. Documentation: Preparing the List of Works Cited

1. Documenting Resources
2. MLA Style
3. List of Works Cited
4. Citing Periodical and Nonperiodical Print Publications
5. Citing Web Publications
6. Citing Additional Common Resources
7. More than One Publication Medium

B. Documentation: Citing Sources in the Text

1. Parenthetical Documentation and the List of Works Cited
2. Information Required in Parenthetical Documentation
3. Readability
4. Sample References
5. Using Notes with Parenthetical Documentation

UNIT V

A. Other Systems of Documentation

1. Endnotes and Footnotes
2. Author Data System
3. Number System
4. Specialized Style Manual

B. Abbreviation

1. Introduction
2. Time Designation
3. Geographic Names
4. Common Scholarly Abbreviation
5. Publisher's Name
6. Symbols and Abbreviation Used in Proofreading and Correction

Core Paper I	Code: 20MCHC11	RESEARCH METHODOLOGY	Hours-5 / Credits – 4
--------------	----------------	----------------------	-----------------------

OBJECTIVES

1. To Know the primary and secondary sources in literature survey
2. To Understand the concept of documentations in thesis writing
3. To Learn the needs of various tests in error analysis
4. To Study the C language and its applications in chemistry
5. To Ascertain various instrumentation methods

UNIT 1- Literature search

Searching the chemical literature, primary sources- journals and patents, secondary sources-Beilstein, reviews, periodicals-serials-monograph and text books, dictionaries, encyclopedias, catalogues and index of tabulated data, location data, location of published and comprehensive account of research with special reference to physical, organic and inorganic chemistry. Inductive and deductive reasoning-role of experimentation-interpretation of results-formation-testing and rejection of hypothesis- Getting idea on impact factor of journals- Leading funding agencies in India- Submission of research project proposals.

UNIT 2 -Thesis writing

Thesis layout: Format of title page, certificates, declaration, Preface, acknowledgements and table contents. Text of the thesis: Chapter division and subdivision-use of centered reading, side heading and paragraph heading. Quotations: When, what and how to use quotations, interpolation of quotations. Footnotes, tables and figures: Format, conventions and referencing. Documentation: Methodology of writing references-MLA and APA style. Editing and evaluating: Basic idea of editing, revising and evaluating the thesis. **Ethics and research Plagiarism.**

UNIT 3 - Error in chemical analysis and statistics

Classification of errors-accuracy-precision-minimization of errors-mean-standard deviation-Normal or Gaussian distribution-Reliability of results-Confidence interval-comparison of results-Student's t-test, F test, paired t-test-correlation and regression-the least square method for deriving calibration plots like straight line-Analysis of variance (ANOVA)- Pearson correlation coefficient-r value.

UNIT 4 - Computers in chemistry

Data types: int, short, long int, float, double and long double; variable and scope. Global automatic register and static operators: assignment, caching, precedence and associativity; program selection: if-else logical operators-ternary operator switch statement; Repetition: while, do-while and for loops, goto statement; functions, void, Return statement, invoking functions, passing arguments-prototyping.

Array: Single dimensional arrays, accessing arrays, initializing and copying arrays-array as function arguments-multidimensional arrays.

Simple C programming applications in chemistry such as van der waals equation, pH titration, kinetics, radioactive decay, evaluation of lattice energy and ionic radii from experimental data. Use of computer in literature search, significance of chemdraw-drawing chemical structure-paste them in the text.

UNIT 5 - Analytical Chemistry

Electro Chemical methods: Voltammetry – principles-linear sweep voltammetry-cyclic voltammetry, differential pulse voltammetry-electrodes and electrolytes- pulse polarographic methods-applications.

Principles and instrumentations of Atomic Force Microscopy (AFM), powder XRD, Scanning Electron Microscopy (SEM), Transmission Electron Microscopy (TEM) and HRTEM, Scanning Tunneling Spectroscopy (STS), Scanning Tunneling Microscopy (STM), Thermo gravimetric Analysis (TGA), Differential Thermal Analysis (DTA), Differential Scanning Colorimetry (DSC)

Abstract

The phase pure Ca²⁺ doped ZnFe₂O₄ (Zn_{1-x}Ca_xFe₂O₄ with x=0.0, 0.2, 0.4, 0.6) spinel ferrite nanoparticles have been synthesized by solvo-thermal method. X-ray diffraction peaks perfectly match the peaks corresponding to the cubic spinel structure with space group Fd 3m. The structure factor corresponding to miller lattice planes and parameters like lattice parameters, anion positional parameter (O₂), etc., are calculated using Rietveld refinement strategy. The cation distribution study reveals mixed spinel structure with both Ca²⁺ and Fe³⁺ ions occupying both tetrahedral A site and octahedral B site and Zn²⁺ occupying only at tetrahedral A site. The experimental X-ray density, hopping length, ionic radius of both A and B sites, inter ionic distances between (Me - Me) and (Me - O), where Me and O stands for metal ions and Oxygen ion respectively, bond angles and crystallite size are found and well correlated with theoretical predictions. The electron density distribution and bonding are computed using Maximum Entropy Method (MEM) and visualized both in 3D and 2D using VESTA. The quantitative and visual bonding study reveals covalent bonding between A site ions and O₂ ions and ionic bonding between B site ions and O₂ ions for all the compositions and both are dominating for the composition Zn_{0.8}Ca_{0.2}Fe₂O₄. Also the A-B interaction is maximum compared to A-A and B-B interactions and A-A interaction is the weakest one. The surface morphology and
